## Bolly TOUCH

The Touch is an ergonomic ultralight carbon hunting stock designed for the Tikka T3 and CZ 452/455 actions with a modified wrist to also accommodate most other commercially available actions. The core materials and carbon fibre construction result in a stock that is astonishingly light yet incredibly strong. It is the ultimate ultralight hunting stock.

## Bolly F Class (ZCR-FC)

With its shape designed in conjunction with Ziersch Custom Rifles, Bolly proudly introduces the ZCR-FC, the lightest F class stock in the world. With wait times measured in days not months, the ZCR-FC is poised to revolutionise FT/R shooting and is available now. Weighing in at under 700 grams inletted, the ZCR-FC incorporates a carbon fibre construction with a dual density composite core that actively negates vibrations. Just don't tell the rest of the world until after the world championships.
